

# Coronavirus: Being careful.

This Social Story was written by Gino Lerario [gino.lerario@hse.ie](mailto:gino.lerario@hse.ie) for the North Tipperary Children's Services using Carol Gray's Social Story Method. To adapt it, go to [www.carolgraysocialstories.com](http://www.carolgraysocialstories.com) for the 10 criteria for writing Social Stories.

3

Coronavirus is not everywhere  
- it's only in *some* places.

It could be in the air --  
in between people...

Or on surfaces,  
like tables and cups.

And it can get  
into the nose  
and mouth.

But it's too tiny to see or feel,

so we can't be sure  
where it is.

To keep safe from Coronavirus,  
it's a good to think that it *could*  
be there. *Maybe.*

It's a good idea to be careful.

Another way to say "be careful"  
is to say "take precautions."

Precautions are rules we follow to  
keep safe... just in case Coronavirus  
is around.
