

Coronavirus: 10 precautions

While scientists are working
to find the right medicine...

there are ten things I can do
to stay safe.

1

Wash my hands often.

2

Try to keep my hands
away from my face.

3

Cover coughs and sneezes.

4

Tell Mum and Dad if I have a fever
or a cough that won't go away.

5

Stay at home a lot.

6

Keep windows open for fresh air.
That's called "ventilation."

7

Stay back
from others
and wait
for others
to leave
the shop.

That's called "Social Distancing."

8

Play and work in small groups,
not big groups.

9

Wear a mask when I can
(or a visor).

10

Sometimes
check my temperature.

I try to do my best...

but it's okay if I make a mistake.
