

CP Connect series

We are pleased to bring you some updates from our CP Connect series.

Update No.1

In case you missed it... Catch our latest Cerebral Palsy Connect webinar - **Orthotic Management: Best Practices Across the Lifespan** right here at

[CP Connect: Orthotic Management - Best Practice Across the Lifespan | Cerebral Palsy Resource](#)

In this clip, CPF's own Katy Gaastra, shares a little about her ExoSym — a carbon fiber orthotic device — and how her experience with orthotics has evolved as she's gotten older. We also hear from Declan Sweeney, PhD and his experience with orthotics and prosthetics. Watch the full talk and discover all of the resources we discussed at the link above.

We're excited to continue growing this series through future virtual and in-person events for families and adults with cerebral palsy. Stay tuned for additional CP Connect events coming soon!

Update No.2

We have an exciting live, FREE webinar coming up at the end of the month!

Join us on 20 July at 7:00 PM for our Cerebral Palsy Connect event on Work & Access.

This webinar is being delivered by the **Dept. of Social Protection**.

[Webinar Registration - Zoom](#)

It may be of interest to families preparing to transition to adult services.

Thank you for your continued support and engagement.

Nicola Welford - Community & Communication Officer Ireland Cerebral Palsy Foundation nicola.welford@yourcpf.org
